the jurors, who have selected the winners and reported among 100 entries received from over 40 countries around the world, the Argentine David Basulto, founder of the great web platform Archdaily, entrepreneur Paolo Cادuro, Cesare Maria Casati, director of *l'Arca International*, architectural historian Richard Haslam, Francine Houben, well-known studio Mecanoo of Delft, Japanese Katsufumi Kubota, Lucia Marzotto, client and entrepreneur, artist Michelangelo Pistoletto, Dan Pitera, dean of architecture at the Detroit Mercy University; Sammicheli, head of international relations at the Milan Triennale, as Philippe Prost, the architect who, with the Hauts de France, won the X Edition.

REFINERY OF OIL
CERSAIE 2019 - WWW.CERSAIE.IT

Cersaie 2019 (27 September-05 October) will feature the latest developments in the oil refinery sector. The exhibition will be held at Fiera di Bologna, Italy, and will bring together leading companies from around the world. The exhibition will focus on the latest technologies and innovations in the oil refinery industry, including the latest developments in refining, petrochemicals, and energy generation.

The exhibition will feature a range of exhibitors, including:

- Dedalo Minnose**: Dedalo Minnose is a leading provider of industrial equipment for the oil and gas industry. They will be showcasing their latest products, including the Dedalo® Minnose system, which is designed to reduce energy consumption and improve efficiency in the oil refinery process.
- Conex Global**: Conex Global is a leading provider of industrial services and solutions for the oil and gas industry. They will be showcasing their latest products, including the Conex Global system, which is designed to reduce energy consumption and improve efficiency in the oil refinery process.

WWW.DEDALOMINNOSE.IT

Leading international oil refinery equipment manufacturer Dedalo Minnose has announced its participation in Cersaie 2019, the international exhibition for the construction and industrial sectors, which will take place from 27 September to 05 October 2019 at Fiera di Bologna. Dedalo Minnose will be exhibiting its Dedalo® Minnose system, which is designed to reduce energy consumption and improve efficiency in the oil refinery process. The Dedalo® Minnose system is a unique solution that combines the latest technologies in energy recovery and waste heat recovery to reduce energy consumption by up to 20%.

The Dedalo® Minnose system is based on a modular design, allowing it to be easily integrated into existing refinery infrastructure. It features a range of sensors and control systems that monitor the refinery's performance and automatically adjust the system to optimize energy efficiency. The Dedalo® Minnose system is also highly reliable, with a track record of over 10 years of successful operation in a range of different refinery environments.

Dedalo Minnose is committed to providing innovative and efficient solutions for the oil refinery industry. By participating in Cersaie 2019, Dedalo Minnose is demonstrating its commitment to the industry and its desire to stay at the forefront of technological development.

Dedalo® Minnose

The company, located in the heart of the Po Valley, has been involved in the research and development of energy recovery systems for over 10 years. Dedalo Minnose has developed a range of products, including the Dedalo® Minnose system, which is designed to reduce energy consumption and improve efficiency in the oil refinery process. The Dedalo® Minnose system is a unique solution that combines the latest technologies in energy recovery and waste heat recovery to reduce energy consumption by up to 20%.
